COURSE DESCRIPTION

Arising out of the tradition of American entrepreneurship, PMA (Positive Mental Attitude) was developed by Napoleon Hill from the thoughts of many of the turn-of-the-century business leaders who played a significant role in shaping the destiny of America and the world. Andrew Carnegie so strongly believed in the existence of universal principles that when followed would lead an individual to success in any undertaking. He subsequently sponsored Hill to research the lives of 500 successful individuals to determine if there indeed was common thread. This course will examine the findings of Hill and others that when properly applied will help lead to personal achievement and success pathways.
